4. Features:

- **Responsive Design**: Works seamlessly on mobile, tablet, and desktop.
- **Dynamic News Section**: Keeps users updated with the latest Olympic happenings.
- **Athlete Profiles**: Showcases popular players and their playing styles.
- **Dark & Light Theme Toggle**: Allows users to switch between themes for better accessibility.
- **Gallery**: Visual representation of Olympic moments.
- **FAQs Section**: Helps users quickly find answers.

5. Development Process:

- Planned the layout and navigation.
- Designed wireframes for each page.
- Implemented responsive design principles.
- Added dark/light theme functionality.
- Tested across multiple devices and browsers.

Conclusion

"This Olympic responsive website provides a comprehensive platform for fans to explore news, athletes, events, and media. With its responsive design and theme customization, it ensures a modern and user-friendly experience."

DOCUMENTATION

1. Introduction

- Briefly explain the purpose of the website.
  Example:
  "This website was created to provide information about the Olympic Games, including the latest news, popular athletes, and upcoming events. It is designed to be fully responsive, ensuring accessibility across desktops, tablets, and mobile devices."

2. Objectives

- State the goals of the project:

- Deliver accurate and engaging Olympic content.
- Provide easy navigation with multiple pages.
- Offer a modern user experience with dark and light themes.
- Ensure responsiveness for all screen sizes.

3. Technologies Used

- **HTML5** – for structure.
- **CSS3** – for styling and responsiveness.
- **JavaScript** – for interactivity (theme toggle, navigation).
- **Responsive Frameworks** (if used, e.g., Bootstrap, Tailwind).
